Hi Josh,

Thank you for providing pricing info regarding embroidering but can we have pricing for heat transfer also?

So if the vests are \$7.50 @ 25 units = \$187.50

The embroidering \$40 each + \$100 setup @ 25 units + vests = \$1287.50

Please provide heat transfer pricing too.

Andy,

I can provide the vests for \$7.50 each.

Andy,

I'd recommend embroidering them If you are looking for something that is going last long on those vests. The holes on the vest are notorious for prints (look bad and longevity). Embroidering them costs more but they would look the best and last much longer. \$100 set up and \$40 per vest. Let me know if you have any questions. Thanks!

Can we have a quote for 25 printed vinyl heat transfers vests and another with silk screen vests? Will we be able to use the colors we want?

What's the difference between those two processes? Which one lasts longer?

Andy,

We can't DTG print onto polyester. We wouldn't be able to print a sample. We can do it on any fabric that is at least 50% cotton. (safety yellow t-shirt) We can do vinyl heat transfers, silk screen or embroider onto polyester. We wouldn't be able to sample those though. I can give you a quote. I would just need to know the quantity and if we are providing the garments. Whatever method you choose, we can have them ready by the 5th. Thanks.

Hey Josh,

Eric E. told me to send you these print files to get a sample print of our possible new vests ready before April 5th. I also attached placement image for reference.

Can you print a sample? Also when can I pick it up from your store?

Thanks, Talk to you later.
